In Louisiana, our students are required to complete 1500, at a cost of around \$20,000. Upon completion they have to wait several weeks/months before getting their test date. The large majority of students fail the state board on the first test date.

Our state board requires NO continuing education, does not check for cleanliness (for the guest of the salon), and only makes sure that our cosmo license is up to date. Basically state board is a straight money grab! They have no regard for the guest or the craft!! It's disgusting...

I certainly don't want to hurt the craft that I love dearly, but I'm yet to see the benefit of state boards or a license. You become better by practicing and passion not by a pice of paper.
