Subject: RE: Public Records Request

Mr. Burns: May we assume that your last request on this email regarding Mike Noel's emails, letters and texts pertain to the Ronald Greene incident or anything associated with it? typically we do not ask this question however, we have completed the search and have identified nothing responsive to your request related to Ronald Greene incident. We have identified emails with the term "greene" in them however, they are in no way associated with the Ronald Greene incident. Many of these emails deal with department matters that would still require me to review and redact the emails. In this circumstance, the work necessary to do that is overly burdensome considering that although responsive to your request to search for "Greene" these emails in no way related to what I think you are looking for based on your date range.

There were no text messages or voicemails to search because LTC Noel turned in his phone when he left LSP and at that time his phone was sanitized pursuant to policy.

Finally, LTC Noel's letter correspondence was searched without any results.

Please advise if this response suffices on this issue. fdm
